Late from Oregon. The Indiana State Sentinel of the 6th inst. contains the following interesting letter from Oregon : OREGON CITY, August 18, 1849. To the Editor of the Indiana State Sentinel:

Enclosed I send you the message of our mutual friend. Gov. Lane, to the Legislative Assembly of the Territory of Oregon.

The Governor is very promyt in defending the Indians in their fisheries and other rights essential to their comfort and subsistance, and on the other hand exacts from them more respect to the rights of our citizens than one not accustomed to them would suppose them capable of yielding. We have had no late difficulties with them, and I believe his policy will secure us against any future difficulty. The Governor is almost constantly engaged in hearing their petty grievances, and redressing them in a plain and summary way, that makes them pay respect to the rights of one another, and abstain from depredations upon the citizens. Our legislature is in session. They are men of good sense, and well understand the wants of the people of the Territory.

The courts in my district are in session. Last week I held court in Linn county, in this, in Champoeg, and next week will hold court in Clackamus. and week after in Vancouver, which will end my circuit. I found but little business to do. The grand jury found four or five indictments for small offences, such as hog-stealing and stealing horses from the Indians, &c., in Champoeg. Such things will happen at first; but I think, judging from the mass of the citizens, who are mainly very orderly and honest, that these lawless characters will not long remain amongst

I was up this (the Willamette) valley as far as the Calapoosa settlement. I never saw a richer valley of land; and the mountain scenery is captivating .-The health of the country is good, and the harvest is abundant. This is the greatest country for wheat on the continent. I have never seen finer wheat grow than we have this year in Oregon, not near all of which will be saved for the want of laborers. The ordinary wages for laborers in the harvest field is \$6 per day to each man.

Every kind of labor commands nearly any price asked for it. The packers, in advance of the emigration, arrived to-day. They report 8,000 wagons on tual in their times of arrival and departure. out from Missouri to Blue river, about 400 miles: much sickness of fevers among the emigrants, and some deaths. We anticipate much sickness and distress among the land emigration. The packers are of will break them down.

If the twentieth part of the protection was given to the trade of this river that is extended to the mouth of the rivers in the States, the Columbia would be found to be a much better bar than that of most rivers in the States of its size. The lumber trade of this river is quite an important trade; so of the wheat

Our people are returning from California every day with large sums of gold, the product of the mines. I have before me a statement showing the arrivals and departures of vessels coming in and going out with freight over the Columbia bar, which has heretofore been considered impassable. Since the 7th of May, ships of every size, from forty tons to seven hundred tons burthen, amounting to fiftyeight, up to the 18th of this month, and not a single accident of a serious character has happened.

The Legislature was this evening engaged in devising means to alleviate the sufferings of the emigrants. Many of them will not be able to get through, it is believed, with the best assistance we

can give them. We have no paper published in this territory, and I cannot furnish you with a printed copy of the Governor's message. He is quite well-left here this morning for the Umpqua valley, accompanied by Lieut. TALBERT, with an escort, to examine Alice's bay and to see the Indians of that part of the territory. It turns out that there are several good harbors on the coast below the mouth of the Columbia river, although it has heretofore been reported an iron-bound coast. Yours, truly,

The Hungarian Patriots on Board the American Stemship Herman.

The Southampton correspondent of the London Times, writing under date of the 18th ult., gives the following interesting information: The United States mail steamer Herman, Capt. G. Crabtree, arrived here this morning from Bremen, en route to New York.

The Herman left Bremenhaven on Thursday, at noon, but in the night experienced a tremendous gale in the North Sea, during which she was obliged to heave to till the weather moderated. She has, therefore, reached Southampton one day after her appointed time, the first instance of irregularity in the present year, on the part of the American steamers, which have in 1849 hitherto been exceedingly punc-

the road; about 2,000 bound for this territory, the The Herman has about thirty passengers from Breresidue for California. The cholera had been fatal men to New York, amongst whom are some Hungagarian colony. He has letters of introduction to General TAYLOR, President of the Republic; to the opinion that they are rushing and pressing their cattle so hard, in order to get out to the mines, that they America. He is accompanied by his two sons and noble breast, should forever extinguish the prejuditwo daughters, and by several Hungarian officers, who appeared on the deck of the Herman, dressed in the picturesque military costume of Hungary. La-DISLAS UJHAZY is an aged and venerable looking man. with a flowing grey beard and moustaches, and wearing a singular semi Oriental dress.

Another extraordinary Hungarian on board this steamer is Mademoiselle Apolonia Jagella, who ry during the Hungarian war, and was subsequently adjutant of the army in the fortress of Comorn during the time that city held out against the Austrians .-MADEMOISELLE JACELLA is represented to have been all pouring into one. DLACKWOOD'S MAGAZINE AND THE BRITISH O QUARTERLY REVIEWS .- Owing to the late revolutions and counter-revolutions among the nations of Europe, which have followed each other in such quick succession, and of which "the end is not yet," the leading periodicals of Great Britain have become invested with a degree of interest Great Britain have become invested with a degree of interest hitherto unknown. They occupy a middle ground between the hasty, disjointed, and necessarily imported records of the newspapers, and the elaborate and ponderous treatises to be furnished by the historian at a future day. Whoever reads these periodicals obtains a correct and connected account of all the important political events of the old world, as they occur, and learns the various conclusions drawn from them by the leading spirits of the age. The American Publishers therefore deem it proper to call renewed attention to the works they re-publish, and the very low prices at which they are offered to subscribers. The following is their list, viz:

THE LONDON QUARTERLY REVIEW,
THE EDINBURGH REVIEW,
THE NORTH BRITISH REVIEW,
THE WESTMINSTER REVIEW, and

THE WESTMINSTER REVIEW, and BLACKWOOD'S EDINBURGH MAGAZINE. In those periodicals are contained the views, moderately, though clearly and firmly expressed, of the three great parties in England—Tory, Whig. and Radical—"Blackwood" and the "London Quarterly" are Tory; the "Edinburgh Review" Whig: and the "Westminster Review" Liberal.— The "North British Review" owes it a establishment to the last great ecclesiastical movement in Scotland, and is not ul-tra in its views on any one of the grand departments of hu-man knowledge; it was originally edited by Dr. Chalmers, and now, since his death, is conducted by his son-in-law, Dr. IANNA, associated with Sir David Brewsten. Its literary haracter is of the very highest order. The "Westminster, though reprinted under that title only, is published in England under the title of the "Foreign Quarterly and Westmir ster," it being in fact a union of the two keriews formerly published and reprinted under separate titles. It has, therefore, the advantage, by this combination, of uniting in one work the best features of both as heart for the perfect of the combination. ork the best features of both as heretofore issue The above Periodicals are reprinted in New York, immedi-
